

EXPERT TRAIN TRACKS

Free printable puzzle · Medium · 10×10

How to play. Draw one continuous track from S to F through shared cell edges. The numbers above the grid show how many cells in each column hold track; the numbers on the right do the same for each row. Every printed piece of track is part of the route, exactly as shown. No branches, no crossings, no loops. S and F count too, and a bend uses one cell. The solution is on the next page.
